

1. Project Overview

Project name: Sweetshop responsive web testing
Application type: Web Application
Objective: To validate the core functionalities of the Sweetshop e-commerce web application, including user authentication, product browsing, shopping cart, checkout process, responsive behavior, and usability across supported devices.

2. Scope of Testing

In Scope

- User Login, Logout
- Product display and navigation
- Cart and Checkout
- Responsive mobile web testing
- UI and validation checks
- Cross-browser testing

Out of scope

- Performance testing
- Security testing
- Automation testing
- Database testing

3. Tools Used

Tools

- Safari Browser
- Google Sheets
- Apple Simulator (iPhone 17)
- MacOS
- GitHub

Purpose

- Functional & Responsive Testing
- Test Management
- Mobile Testing
- Desktop test environment
- Project Documentation

4. Device Matrix:

Device	Browser	Resolution	Purpose
Macbook	Safari	Desktop	Full Regression
iPhone 17	Safari	402 × 874	Responsive Testing

5. Test Approach

Testing will be performed manually by executing predefined test cases. Each feature will be tested for expected functionality, validations, and edge cases. Bugs will be identified and documented with clear steps and expected vs actual results.

6. Entry & Exit Criteria

Entry Criteria:

- Application is accessible
- Test environment is ready
- Test cases are prepared

Exit Criteria:

- All test cases executed
 - Major bugs identified
 - Test summary report created
-

7. Defect Management

Bugs will be reported with:

- Bug Title
 - Steps to Reproduce
 - Expected Result
 - Actual Result
 - Severity & Priority
 - Screenshot (if applicable)
-

8. Test Deliverables

- Test Plan
- Test Scenarios
- Test Cases
- Bug Reports
- Test Execution Report
- Test Summary Report
